

Fleet Management Solutions TRAILER & ASSET TRACKING

INCREASE UTILIZATION, IMPROVE SECURITY, & GAIN VISIBILITY INTO YOUR BUSINESS.

The FleetLynx fleet management solution for trailers and assets is designed for reliable long-term deployments in trailers, construction equipment, mobile generator sets, and other assets that may or may not have their own power source. The solution allows business owners and fleet managers to assign trailers and assets to drivers and/or vehicles. It provides real-time information on location, utilization, temperature, cargo presence, and door status for all your assets and trailers.

With FleetLynx, performing yard checks for available trailers can be done without ever leaving the office.

SUPERIOR TECHNOLOGY, COMPETITIVE PRICE

The FleetLynx solution provides you with actionable business intelligence you can use to increase productivity and reduce costs. Whether you currently have a trailer and asset management solution or not, our team can help you in installing or migrating to a more advanced technology in an affordable manner.

SOLUTION COMPONENTS

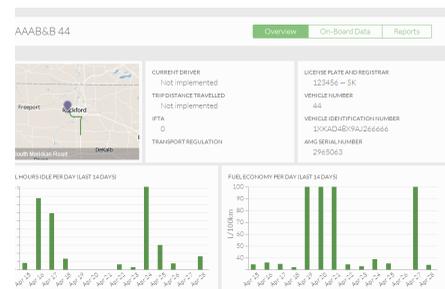

FleetLynx Covert

The FleetLynx Covert is a battery operated non-rechargeable trailer and asset tracking unit designed for reliable long term deployments. The unit has a battery life of seven years and can be mounted virtually anywhere on the asset/trailer which makes it ideal for theft prevention.

FleetLynx Legion

The FleetLynx Legion is robust GPS device for tracking both tethered and untethered trailers. The device can connect to temperature, cargo, and door sensors using any of the hardware's three inputs. The device's battery is automatically recharged when the trailer connects to a vehicle.

FleetLynx Web Portal

The web portal improves productivity by providing 24x7 access to location and sensor data of trailers and other mobile assets. Access to the FleetLynx portal is possible from any internet enabled device (smartphone, tablet, laptop, or desktop) which means your data goes with you wherever you are.
